## Can you combine quality, green thinking and ergonomics?

*At Wexiödisk our answer to this question is yes! We call it eco-design. Since we started in 1972 our philosophy has been to work with a focus on quality and sustainability and with the environment as a starting point. Without, of course, forgoing ergonomics and a good working environment.*

Our vision is a circular economy, which means that the economic cycle is not linear but rather circular, with the focus on sustainable development. Wexiödisk develops high-quality products and carefully selects each component. All to help prolong a product's life cycle and conserve natural resources. Our ethos has always been that every dishwasher we develop should be more resource-efficient than the previous model.

### FOR US, A CIRCULAR ECONOMY IS:

- w **A functional stainless steel design that delivers sustainability and a long service life.**
- w **Servicing is normally carried out from the front of the machine. Components can be accessed more easily, making servicing quicker.**
- w **We think about the person! Improved ergonomics, e.g. through Autostart, with automatic opening and closing of the hood, reduces repetitive strain injuries and makes the washing process considerably easier.**
- w **Minimized water consumption. We are continuously working to develop new solutions in order to save even more water and energy and further reduce the need for chemicals.**
- w **Choose ECO-FLOW heat recovery, which effectively saves energy and improves the climate in the dishwashing room.**

Pursuing a **circular economy** has been an element of our Småland brand since we started in **1972**.

Each granule measures just **3 mm.**  
small but very **effective!**

*Clean dishes without compromising on the environment is most important to us at Wexiödisk. And this even applies to potwashing. Containers and pans with burnt lasagne around the edges, prep bowls in which the food has left its mark. Naturally, these should all come out clean.*

Our granule potwashers use a higher water pressure and somewhat longer programmes than those used for normal washes. This means no need to soak any dishes in large tubs, which otherwise complicates the logistics. Even the working environment is improved as heavy lifting and wet floors are avoided.

#### **GRANULES – THE OBVIOUS CHOICE**

Granules are small, blue plastic balls. The washing tank is filled with them and during the washing programme they are circulated together with the water and the chemicals to remove food residue from the dishes. The granules may seem small, but because they weigh more than water they are also more powerful.

#### **SAVE ENERGY WITH ECO-FLOW**

Several of our machines are available with ECO-FLOW – a smart heat recovery system. The energy from the previous washing programme is used to heat the water for the next programme. Air is sucked into the machine and the dishes dry far more quickly and effectively. ECO-FLOW has been developed to save energy while also providing a better working environment by removing the hot steam that forms inside the dishwasher.

#### **SIMPLIFIED MONITORING**

The control system with integrated HACCP monitors all critical parameters to ensure the most optimal washing results possible. Web-Tool, enables external report printouts and network connections.

# Tough on dishes

# kind to nature!

# The dishwasher with room

## for a little more

The WD-8 is a robust and reliable combi-dishwasher designed especially for washing baking trays, thermos boxes/transport containers and canteens. The WD-8 is a further development of Wexiödisk's popular WD-6 and WD-7 dishwashers. Our new dishwasher retains the same good quality and functionality as the older machines and suits both small and medium-sized kitchens. With its high-quality components, the WD-8 offers great reliability while its stainless steel construction makes for a sturdy and durable build.

### A FLEXIBLE WORKHORSE

The WD-8 saves you both water and time, as there's no need to wash large bowls and canteens by hand. Boasting a large capacity washing compartment with a width of 695 millimetres and a height of 505 millimetres, this machine is specially designed for dishwashing larger items, but can also be used for glassware and cutlery as you can easily adjust the water pressure. This makes

the WD-8 a highly flexible combi-dishwasher that can be used for both normal dishwashing and potwashing.

### SMART OPTIONS

If you choose to add the foldable shelf option, you'll gain a flexible machine that can wash several baking trays at the same time. Another useful option is the automatic hood lift with no need to manually raise the hood after each wash – your shoulders will thank you for it! The ECO-FLOW option uses the energy from the steam to heat the water for the next wash, which both saves energy and minimises the amount of steam in the washing room.

### HIGH-QUALITY SWEDISH DESIGN

A good working environment, high levels of hygiene, easy servicing and optimum wash results make the WD-8 one of the best-equipped dishwashers on the market in its sector.

You can rely on the WD-8 every day of the year.

*The combi-dishwasher WD-8 handles larger cooking utensils such as bakery trays, pots and pans by using the foldable shelf. Thermos boxes, GN 1/1-canteens and washing baskets (500 x 500 or 500 x 600 mm) are placed directly into the machine without using the shelf. The water pressure is easy to adjust!*

ECO-FLOW HEAT RECOVERY SAVES ENERGY AND HELPS WASHED ITEMS TO DRY QUICKLY

THE HOOD OPENS AND CLOSSES AUTOMATICALLY (OPTION), ELIMINATING THE RISK OF STRAIN INJURIES

BETTER WORKING ENVIRONMENT WHEN THE HOOD IS ANGLED UPWARDS AT THE BACK SO THAT THE STEAM DISCHARGES AT THE BACK OF THE MACHINE RATHER THAN OUT INTO THE ROOM

EXTRA LARGE WASHING COMPARTMENT MEASURING A FULL 695 MM IN WIDTH

ADD THE FOLDABLE SHELF AND YOU CAN EVEN WASH BAKING TRAYS AND OTHER BULKY ITEMS

HIGHLY FLEXIBLE IN THE KITCHEN. A SIMPLE LEVER SWITCHES THE WATER PRESSURE BETWEEN NORMAL DISHWASHING AND POTWASHING

EASY SERVICING – THE MACHINE CAN BE SERVICED FROM THE FRONT

HIGH LEVELS OF HYGIENE WITH AN AUTOMATIC CLEANING PROGRAMME

### > WD-8 WASHING PROGRAMMES

**Programme 2:** Total washing time 1.7\*

**Programme 3:** Total washing time 3.2\*

\*Factory setting. The washing time can be adjusted.

# Innovative, spacious and flexible

Our latest addition, the WD-12S, is a flexible, high-capacity combi-dishwasher which offers outstanding dishwashing results. This machine is an excellent choice if you wash a wide variety of dishes and need to switch quickly between normal dishwashing and potwashing.

When we started developing the WD-12S, we asked our customers what they wanted. The subsequent development process resulted in a machine which takes into account ergonomics and improves the working environment in the dishwashing room. The WD-12S is a through-feed dishwasher which minimises heavy lifting and enables efficient flow with clean and dirty sides.

Despite its internal dimensions, the design of the WD-12S is both elegant and compact. The hood has bevelled edges and the front of the machine has no joints. The sloping roof also helps to improve drying result, because the final rinse water runs down the front of the machine, rather than dripping onto the clean dishware.

## WHAT DO YOU WANT TO WASH NEXT?

The WD-12S is quite possibly our most flexible dishwasher ever. A simple lever enables you to switch between normal dishwashing and potwashing, and you can also choose both normal dishwashing and potwashing in the same wash

cycle. The water pressure in the wash arms can be adjusted individually, which makes it possible to wash plates on the right and pans on the left, for example.

## INGENIOUS

The machine is simple to use and has a clear display. The hood closes with the simple press of a button and opens automatically when the machine has finished washing. It initially opens just a few centimetres, so that the steam inside can disappear out of the back of the machine. The hood opens fully after a few seconds, sparing users an unpleasant face full of steam. You can also opt for the optional Autostart function, which will start the machine automatically when one or two washing baskets are placed on the basket conveyor.

## QUIET

Thanks to our choice of pumps and the well-insulated design, the WD-12S is a quieter dishwasher with noise levels as low as 63 decibels.

## WD-12S WASH PROGRAMMES

**Programme 1:** Total wash time 1.2 min.\*

**Programme 2:** Total wash time 1.7 min.\*

**Programme 3:** Total wash time 5.2 min.\*

\*Factory setting. The wash time is adjustable.

# spacious

# Time-saving

*Important for Michelin star restaurant*

*PM & Friends is a well-known restaurant located in central Växjö. A hotel, bakery and conference facilities are also available besides world-class gastronomic experiences. The concept is well-known outside Sweden and guests from around the world come to Växjö to enjoy good food and the Småland landscape.*

The restaurant has been awarded one star in the Michelin Guide, as well as a Wine Spectator Grand Award. It is therefore little wonder that high quality goes without saying, which is evident in the choice of ingredients, décor, drinks and of course dishwashers.

## IMPRESSIVELY EASY TO CLEAN

Dishwashers from Wexiödisk have been the obvious choice for the Växjö restaurant since it was established in 1992. The premises have several machines to meet the various needs of the business. The latest addition is a WD-12S, which was recently installed adjacent to the kitchen which serves Fine Dining and the bistro. This is where Emil Bolmgren washes all the equipment which is used by the chefs to prepare food. This mainly involves potwashing, although switching to nor-

mal dishwashing during the same wash cycle is easy. Emil has been using the new machine for a couple of weeks now and is very impressed by how easy the machine is to clean.

“The best thing about the WD-12S is that you don’t have to do anything to clean it. If something seems like a hassle, then it can be hard work, but this isn’t the case with the WD-12S,” explains Emil. “Because the machine only has a strainer basket and a filter tray, I save a lot of time when it comes to cleaning.”

## FUNCTIONAL DESIGN

Wexiödisk paid particular attention to cleaning and hygiene when it developed the WD-12S. The surfaces of both the inside and the outside of the dishwasher are smooth and the corners of the washing area of the machine are rounded, meaning that

dirt is not trapped. The basket conveyor is also hinged, which also makes cleaning easier. The automatic cleaning programme also helps to maintain hygiene, performance and longevity.

## EXCELLENT WORKING ENVIRONMENT

Another distinguishing feature of the WD-12S is its quietness. This is something head chef Anders Lauring believes to be particularly important when choosing a dishwasher.

“It has much less impact on the working environment when a machine has a lower decibel rating,” says Anders.

Anders has worked at PM & Friends for almost 20 years. He has considerable experience of machines from Wexiödisk, but was still surprised by how ingenious the new WD-12S is.

“It feels smaller yet it holds more,” claims Anders. “I have to say it’s fantastic and it has a practical design both outside and in!”

**A dishwasher should be both quick and easy!**

EMIL BOLMGREN

- Equipment at PM & Friends: Two WD-4S for bar glasses, WD-6 for plates, WD-8 for dough bowls in the bakery, WD-90 DUO for tins and canteens, a system using WD6 DUPLUS and PRM, WD-12 for cups and plates in the bakery and a WD-4S for vases and pots in the flower shop.
- The PM & Friends concept includes Fine Dining and bistro, the Bröd & Sovel bakery, PM Bar, hotel, the Flora flower shop and conference facility.
- This involves dishwashing for around 400–600 meals per day.
- The philosophy is based on the cornerstones of forest, lake and meadow.
- PM & Friends is owned by Per Bengtsson, Monica Carlsson and Jesper and Martin Rognefall.

# One dishwasher

## for all your needs

### WITH OR WITHOUT GRANULES

WD-90 DUO is a machine that can take care of both normal dishes and pots and pans, with or without granules. The machine has an automatic hood and a through-feed for improved logistics, ergonomics and hygiene. You avoid heavy lifting and gain a clean and a dirty side in the dishwashing room.

### EASY TO HANDLE

A table can be placed in front of the machine for stacking. The table can also be fitted to the side, where it is easily lowered to provide access to the entire machine. Once the programme has finished, the hood initially opens just a little. Air then enters the machine, the steam is reduced and you are spared hot, moist air blowing in your face. For an even better working environment you can choose the ECO-FLOW option (see page 8).

### SHORT DRYING TIME THANKS TO SPIN CYCLES

One unique function offered by WD-90 DUO is spin cycles when potwashing. Dirty washing water is spun off before the rinse cycle, reducing the amount of clean rinsing water. Following the rinse cycle the dishes are spun a second time, which reduces the drying time.

### > NORMAL WASH, GLASSWARE AND CROCKERY

**Programme 1:** Total washing time 1.3 min.\*  
**Programme 2:** Total washing time 1.8 min.\*  
**Programme 3:** Total washing time 3.3 min.\*

### > POTWASH WITH GRANULES

**Programme 1:** Total washing time 2.2 min.\*  
**Programme 2:** Total washing time 4.2 min.\*  
**Programme 3:** Total washing time 6.2 min.\*

### > POTWASH WITHOUT GRANULES

**Programme 1:** Total washing time 2.2 min.\*  
**Programme 2:** Total washing time 3.7 min.\*  
**Programme 3:** Total washing time 6.2 min.\*

\*Factory setting. The washing time can be adjusted.

### FLEXIBLE ACCESSORIES

By choosing smart accessories you can adapt your WD-90 DUO to the needs of your kitchen. Collapsible tables simplify stacking and can be fitted at the front or to the sides. The potwashing basket can be equipped with different accessories to keep items in place. See the product sheet for more WD-90 DUO accessories.

Collapsible table (accessory). Available for right, left and front installation.

Rubber strap

Flexible insert

Saucepan support and ladle holder

Holder

“We wash pots, pans and containers with granules, but can easily switch to a normal wash when we have a lot of plates to take care of.”

PIERRE ELOFSSON

Pierre Elofsson is the name of the chef who has raised the bar in the kitchen at Hotel Eggers in Gothenburg. Starting out as a junior chef working for hoteliers Lars-Olof Oskarsson and Anna Riis, followed by stints at Aquavit in New York, restaurants in Brazil and no less than nine years in the restaurant business in Moscow, he has now come full circle. The position of head chef was offered to Pierre one year ago, by the new owners of the venerable Hotel Eggers in Gothenburg, the very same Lars-Olof and Anna.

“I didn’t hesitate for a second. I wanted to move home to Sweden and Gothenburg again, and after having worked with Lars-Olof and Anna previously, it wasn’t a difficult decision. Lars-Olof is a dignified, dedicated but very humble entrepreneur, and that suits me perfectly.”

#### THE DISHWASHING ROOM – THE HEART OF THE KITCHEN

The kitchen has just been remodelled and, you could say, optimised. This relatively small space houses not only a well-equipped kitchen, but also a dishwashing room with

a rack conveyor dishwasher with pre-rinsing, a glassware dishwasher and, best of all, a WD-90 DUO combi dishwasher. The latter machine fulfils a great need.

“We wash pots, pans and containers and other large items with granules, but can easily switch the machine to normal washing when we have a lot of plates to take care of. It runs continuously during breakfast, lunch and dinner,” says Pierre, his broad Gothenburg accent shining through. “What’s more, we haven’t employed a dishwasher. There are four of us working in the kitchen and with good planning we can quite easily take care of the task ourselves.”

#### SEVERAL SMART IMPROVEMENTS

There’s no longer any need to soak pots and pans. The granules quite simply remove any food residue, saving a great deal of time. The ECO-FLOW heat recovery system provides a better climate in the kitchen and, in addition to this, the machine’s spin cycle

technology saves copious amounts of water.

There’s no mistaking Pierre’s dedication in the kitchen. Early on during the remodelling, Lars-Olof and Pierre had a clear idea of how the dishwashing room and kitchen were to look.

“Being involved in the design process avoids small irritations in the kitchen, which is important in such a stressful business. It should be fun to turn up for work and the staff are pleased with the hotel renovation.”

Hotel Eggers serves lovingly prepared bistro cuisine, along the lines of Pierre’s honest, straightforward philosophy, and combined with the exquisite surroundings the resulting experience is a real treat. The hotel is one of Sweden’s three oldest and the meticulous renovation of the formerly run-down premises continues.

“It’ll soon be time to inaugurate the hotel again,” says owner Lars-Olof. “We’ve entered the final stage of the renovation, encompassing the hotel rooms and other guest areas. Our rooms are individually decorated and the personal interiors distinguish us from many other hotels.”

- > The kitchen boasts: A WD-90 DUO combi potwasher with ECO-FLOW, a WD-6 hood dishwasher and a WD-153 ICS+ rack conveyor dishwasher.
- > The kitchen serves bistro cuisine with an emphasis on fresh, organic produce.
- > Dishes from some 50 breakfasts, 100 lunches and 80 dinners are handled each day.
- > Wexiödisk’s products were supplied by Storköksgruppen Syd and installed by Göteborgs Storköksservice.
- > Hotel Eggers is owned by couple Lars-Olof Oskarsson and Anna Riis. The interior is reminiscent of Paris at the turn of the century, La Belle Époque, when the city’s cafés, restaurants and art salons acted as living rooms.

# Compact

## *with nice finessees*

If you need a compact installation for potwashing both with and without granules, WD-90GR is an excellent choice.

### ROTATING BASKET

WD-90GR is available in two versions, HC and Flex. HC stands for High Capacity and is the ideal choice for mostly washing pans and containers. Flex is a better choice for more varied dishwashing needs. WD-90GR has a rotating basket, which enables both the water and the granules to reach every nook and cranny during the wash cycle, delivering excellent results.

### SHORTER DRYING TIME AND LESS STEAM

WD-90GR's spin cycles are unique to machines from Wexiödisk. Since the washing water is spun off before rinsing, the amount of rinsing water can be minimised. Following the rinse cycle, the dishes are spun again and this reduces the drying time.

Before the machine opens, the rear panel is cooled with cold water. This reduces the amount of steam and spares you from being exposed to a wall of moist heat when the door opens. A small finesse to improve the dishwashing room environment.

## Customise with optional equipment

### WD-90GR FLEX – FOR VARIED DISHWASHING NEEDS

The square cassette (see next page) and accessories have been developed for different types of dishes, such as pots, grill racks and smaller mixing bowls.

Square cassette

Pot rack

Hexagonal cassette

Pot holder for large pots

Flexible insert

Upright support

Rack holder

Flexible insert

### WD-90GR HC – FOR LARGE AMOUNT OF CONTAINERS

The machine's unique hexagonal cassette offers a high capacity for washing containers, pans, baking trays and grill racks.

SHORT DRYING TIME WITH EFFECTIVE AND ENERGY-SAVING SPIN CYCLES

NO PRE-WASHING AND SCRUBBING BY HAND THANKS TO POWERFUL WASHING WITH WATER AND GRANULES

6 DIFFERENT WASHING PROGRAMMES

DISHES CAN BE STACKED DIRECTLY ON THE HINGED DOOR

THE MACHINE'S CONTROL PROGRAMME FEATURES HACCP MONITORING

THE MACHINE IS EQUIPPED WITH A HINGED DOOR THAT OPENS FULLY TO PROVIDE EASY ACCESS ALL THE WAY TO THE BACK OF THE MACHINE

# The machine with a large capacity

## THROUGH-FEED FOR AN EFFICIENT FLOW

WD-100GR is a granule potwasher that can wash with or without granules. The HACCP function in the machine's control programme ensures compliance with hygiene requirements. The machine is a through-feed model for simplified logistics and improved ergonomics and hygiene. It's also equipped with efficient spin cycle technology. You avoid heavy lifting and it gives you a clean and a dirty side in the dishwashing room. While one cassette is being washed you can prepare the next one, thereby reducing the time taken to switch them. This increases overall capacity and creates an efficient flow in the dishwashing room.

WD-100GR now features a new loading table and refined cassette design, which further simplifies handling with improved logistics and a lower stacking height.

## SMART HEAT RECOVERY

WD-100GR is equipped with ECO-FLOW, which recovers energy from the previous wash cycle to reuse in the next wash cycle. Drier air is sucked into the machine and the dishes dry far more quickly and effectively. Since the steam is condensed, the working environment is improved. The heat recovery system means that the machine only consumes cold water during operation.

### > WD-100GR WASHING PROGRAMMES

- Programme 1:** Total washing time 5.3 min.\*
- Programme 2:** Total washing time 8.3 min.\*

# What's the best dishwasher for your kitchen?

## WD-8

The WD-8 is a robust and reliable dishwasher developed especially for washing baking trays, thermos boxes, transport containers and canteens. The WD-8 is a further expansion of our popular WD-6 and WD-7 dishwashers. Our new dishwasher retains the same great quality and functionality as previous machines and suits both small and medium-sized kitchens.

- *ECO-FLOW (optional) heat recovery saves energy and allows dishes to dry extra quickly*
- *The hood is opened and closed automatically (optional), which eliminates the risk of damage to the basket.*
- *The hood is angled upwards at the rear edge so that the steam rises up the back of the machine instead of in the washroom*
- *Extra large washing compartment measuring a full 695mm in width*
- *High levels of hygiene thanks to an automatic cleaning programme*

## WD-90GR HC and WD-90GR Flex

WD-90GR HC for containers and pans, such as in schools and staff canteens, and WD-90GR Flex for varied dishwashing needs, such as in restaurants. These machines wash effectively using a mixture of water, plastic granules and detergent, reducing the need for typical preparations such as soaking and scrubbing.

- *Perfect washing results and rapid drying*
- *Cassettes designed for different types of dishes*
- *High capacity*
- *Many different accessories for flexibility*
- *Easy to clean, with hinged door*
- *Hygiene control with HACCP function*
- *Steam reduction as standard*

## WD-12S

WD-12 is a flexible combi dishwasher that can be used for both normal and potwashing with the same perfect results. Robust design using parts of the highest quality for many years of reliable service. Features such as automatic hood operation and adjustable water pressure help improve the working environment and enable more tailored wash cycles.

- *Flexible with both normal and potwashing functions*
- *Hygiene control with HACCP function*
- *Automatic hood operation for good ergonomics*
- *Powerful and effective*
- *ECO-FLOW as an option*

## WD-100GR

A complete through-feed dishwashing system with a sorting and loading table and a trolley that provides maximum capacity and separates clean and dirty dishes. Front-loading option for compact installations. The unique spin cycles combined with heat recovery reduce operating costs to a minimum while also significantly improving drying results. Only cold water is consumed during operation.

- *Washing with granules for minimal soaking*
- *Spin cycle technology for rapid drying*
- *Through-feed for the best logistics*
- *Great flexibility with 6 programmes*
- *Hygienic – clean and dirty sides*
- *ECO-FLOW heat recovery*
- *Low operating costs*
- *Hygiene control with HACCP function*

## WD-90 DUO

The robust stainless steel construction results in a granule potwasher with an extra long service life. Combined with automatic hood operation and the environmentally smart heat recovery option, this makes WD-90 DUO an ergonomic and innovative dishwasher perfectly suited to smaller and medium-sized restaurants.

- *No tiresome pre-washing – washing with granules*
- *DUO system – easily switched between normal and potwashing*
- *Through-feed for the best logistics*
- *Short drying time with spin cycle function*
- *Ergonomic with automatic hood operation*
- *Steam reduction as standard and ECO-FLOW as an option*
- *Hygiene control with HACCP function*
- *Automatic hood operation for good ergonomics*
